Big Data And The Consumerization Of IT

The lines are blurring between consumer and business technology. Now, iPhones and iPads are business tools. Next, business users across the organization will access big data tools. This self-service revolution pushes insight from different data sources directly to those making decisions.

Today's business user will adapt. Will you?
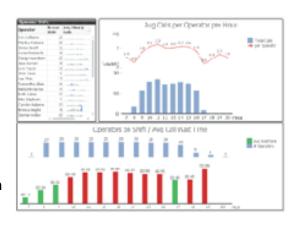

Why empower workers with big data?

- Workers closer to data make better decisions

- Mobile devices and applications supply rich analytics

- IT should focus on technology, not reporting

But taking advantage of this new human capital requires easy-to-use tools and proven technologies.
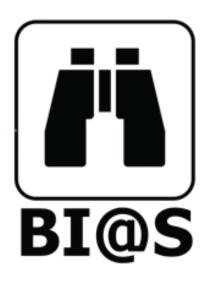

BI@S, Business Intelligence as Service, delivers leading-edge data analytics tools in the cloud. It's a proven combination for easier adoption throughout your entire organization.

BI@S analytics are:

- Cloud

- Compliant

- Outsourced

- Integrated

- Mobile
