

Campus Recreation

CSI Campus Recreation software delivers a truly integrated, single-source solution for taking campus recreation centers to new levels of performance and capability. Driven by industry-leading knowledge and expertise, CSI's SpectrumNG offers a complete software package designed for today's larger, more sophisticated campus environments.

Purposely engineered for the growing demands placed on your facility, join a prestigious list of universities throughout the U.S. and Canada that have partnered with CSI to bring innovative services and operational excellence back to campus.

From billing to business intelligence, CSI Software powers every aspect of your center – down to your first member and last piece of equipment. Enjoy full training and support. Know your data is secure and accurate. Grow and scale to any size because SpectrumNG is fully integrated, ever-evolving, and built with your needs in mind.

Our Campus Recreation software is a perfect mix of modules and functionality custom fit for new centers, expanding ones, and those looking to upgrade an outdated system. Built on the latest technologies and a trusted platform, SpectrumNG makes the difference for any university wanting to make a smart investment in their future.

Get ready to quickly view and update member information. Track revenue and pull detailed reports of your center's performance. Go online and let members and staff access vital information. Schedule facilities, staff, intramurals and club sports. And customize everything to match your unique people, services and vision.

The opportunities are endless for your recreation center to become more productive and efficient, creating a better resource for students, alumni, faculty - and administration.

Campus Recreation Benefits:

- Manage member data and control member access based on facility rules.
- Track scheduling, billing and resources from one, integrated source.
- Publish online and connect your services to any web-enabled device.
- Make smarter business decisions based on powerful analytics.
- Automate your facility with industry-leading technology and support.

Campus Recreation in Action

Bigger, modern, and definitely more complex, recreation centers have become anchors for campus life and selling points for prospective students. And you no longer just provide a service - you provide an experience. There's a lot at stake, and SpectrumNG

helps you execute your plan for a state-of-the-art facility.

Are you building new center? Expanding your services? Maybe your old software just can't catch up? CSI's Campus Recreation software is agile and robust, with enough speed and intelligence to exceed your requirements and lead your initiatives. And with regular upgrades and releases, you stay on the leading edge because SpectrumNG adapts and grows with your business.

SpectrumNG is a comprehensive suite of applications. Here are just a few highlights designed to meet the challenges of today's campus recreation center:

Member Management

Keep pace with students, faculty, alumni and others using your facility. Billing information, activity preferences, medical limitations, email addresses and many other functions make the Member Management module a valuable administrative tool.

Access Control System

Drive member traffic through designated access points in a fast, secure environment. Customize ACS to fit the needs of your facility, and enforce facility usage rules based on member type. And with students, faculty, alumni or anybody else, monitor access and maintain the integrity of your membership agreements.

Online Services

SpectrumNG leverages the power of the web, capturing new opportunities and publishing timely data around the clock. Access Online Services from any computer, tablet or smartphone – today's digital-native student demands it. Automate registration for programs and classes. Customize and control booking requirements for up to 50 viewable schedules. Create a paperless environment. Extend your reach and engage more members when you go online.

Equipment Check-Out

Provide a fast and easy way for your staff to handle rental services while tracking equipment inventory and usage. Utilize bar code technology to manage your resources. Equipment Check-Out is fully integrated to collect rental fees through Point of Sale, and charge both late fees and replacement fees direct to a member's account.

League Scheduler

Gain control over your intramural and club sports with a powerful end-to-end tool for scheduling games, keeping statistics and managing teams. Even build and edit tournament brackets. Not all of your student-athletes are on scholarship, and SpectrumNG provides an organized, professional method for enhancing campus life outside of the classroom.
