CSI SOFTWARE RANKS NO. 1 IN THE TOP 100 AGAIN FOR 2016

CSI Software has once again captured the top spot for software providers in the Top 100, dominating the competition for the ninth consecutive year. Club Industry magazine's annual Top 100 Health Clubs list ranks each company by gross revenue and is the benchmark for vendor market penetration.

SpectrumNG, CSI's flagship software platform, helps health and fitness facilities improve customer relationships, cut costs, and make more money. More companies on the Club Industry Top 100 use SpectrumNG than any other vendor software. Repeating its top ranking from last year, CSI put up even more impressive numbers in 2016.

CSI's 39 percent market share for 2016 is more than the combined total of their next seven competitors. Also, the company's 39 percent share represents its largest share to date, extending its Top 100 lead while continuing to show year-over-year share growth.

Along with the fitness centers CSI serves, the company aims to create a wellness environment where health, happiness and technology come together.
